DURATECH TECHNOLOGY

Duratech Fans come with 5 years Duratech warranty. Duratech uses premium components, designed to deliver a superlative performance over the years.

Here's a quick look at the key components that form the core of the Duratech technology.

Duratech comprises of:

High Endurance Box Capacitor

Duratech's high-endurance box capacitor, with a patented adapter, ensures superior performance over a longer period as compared to ordinary oil-filled tube-type capacitors.

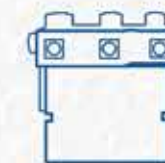

High Grade EMQ Bearing

EMQ bearings used for the Duratech motor are the highestgrade bearings available for fans. They are silent and smooth, and have the additional advantage of reduced friction and vibration.

Dual Coat Winding

Dual-coat winding, offers double protection, ensuring better insulation and abrasion resistance when subjected to high temperatures and sudden overloads. This results in longer durability as compared to ordinary winding.

High Standard Hybrid Steel

Duratech fans use hybrid steel which is highly compatible with electric motors. The composition and the thickness of the steel ensures fan durability and efficiency.
